

Final Project Report: University Campus Security App

Alexander Crespo, Oscar Ordonez Mendieta,
Brandon Primus, Jose Alcantara

Project Overview

The University Campus Security App is designed to improve campus security by providing a dedicated mobile platform for incident reporting, emergency alerts, and to delegate security related tasks to security personnel. The goal of this application is to bridge the gap between the students, faculty, and campus security by offering tools that simplify reporting, improve response times, and increase transparency of security related incidents on campus.

We utilized Flutterflow in parallel with Firebase to develop this app, and create a user friendly experience while maintaining secure access for different user roles: students/staff, security personnel, and managers. The app supports direct communication between users and the security team and lays a foundation for future integration of real time monitoring features such as CCTV, and access control.

Overview of Requirements

We gathered requirements through surveys, interviews with students and staff, and observations. Below is a summary of the features we aimed to implement and the completion status.

Functional Requirements Fulfilled:

Incident Reporting System: Fully implemented with a report forum for users, optional location sharing, and logging of reports.

Emergency Alerts: Admin/Manager roles can push emergency alerts through the message board,

User Role System: Different user experiences for security, managers, and general users.

Manager Panel: Manage submitted reports, assign tasks, and manage all personnel.

Security Dashboard: Access assigned task and view alerts.

Message Board: For alerts from the system and security staff.

Requirements Not Completed:

Live CCTV Feed

Access Control

Real Time Notification System

Multilingual and Accessibility Support

Non Functional Requirement Partially Met:

Ease of Use: App is easy to use and intuitive

Performance: Functional under testing

Security: Basic account system but full authentication not finished

Roles:

Alexander Crespo: Project Manager/ Backend developer (Oversaw entire project scope, maintained milestones, and completed backend. Minorly helped with front end)

Oscar Ordonez: Lead Front End developer/ System Analyst (In charge of front end and design, and refined flow of entire project)

Brandon Primus: Assistant Front End Developer (Helped design front end under lead of Oscar)

Jose Alcantra: Assistant Front End Developer/ / Software Architect (Helped design front end under lead of Oscar and designed comprehensive documentation)

GitHub Link (We designed project on Flutterflow so Github is low on commits and versions)

University Security App Documentation

Welcome to the University Security App! This guide will walk you through signing up, setting up your profile, and using the app's core features.

Prepared For: University Students and Staff

Prepared By: Alexander Crespo, Oscar Ordonez, Brandon Primus, Jose Alcantara

Version: 1.0

Date: 4/29/2025

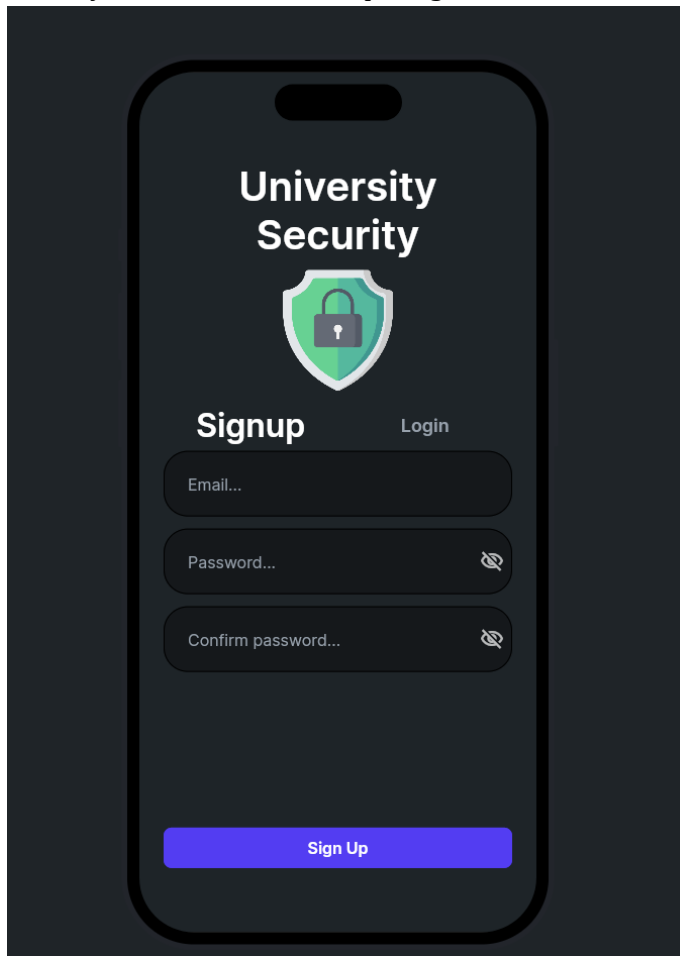

Table of Contents

1. Account Creation
2. Setting Up Your Profile
3. Home Dashboard
4. Submitting a Security Report
5. Network Section
6. Security Role Features
7. Manager Role Features
8. Communication Center
9. Customizing Your Experience
10. Notes

1. Account Creation

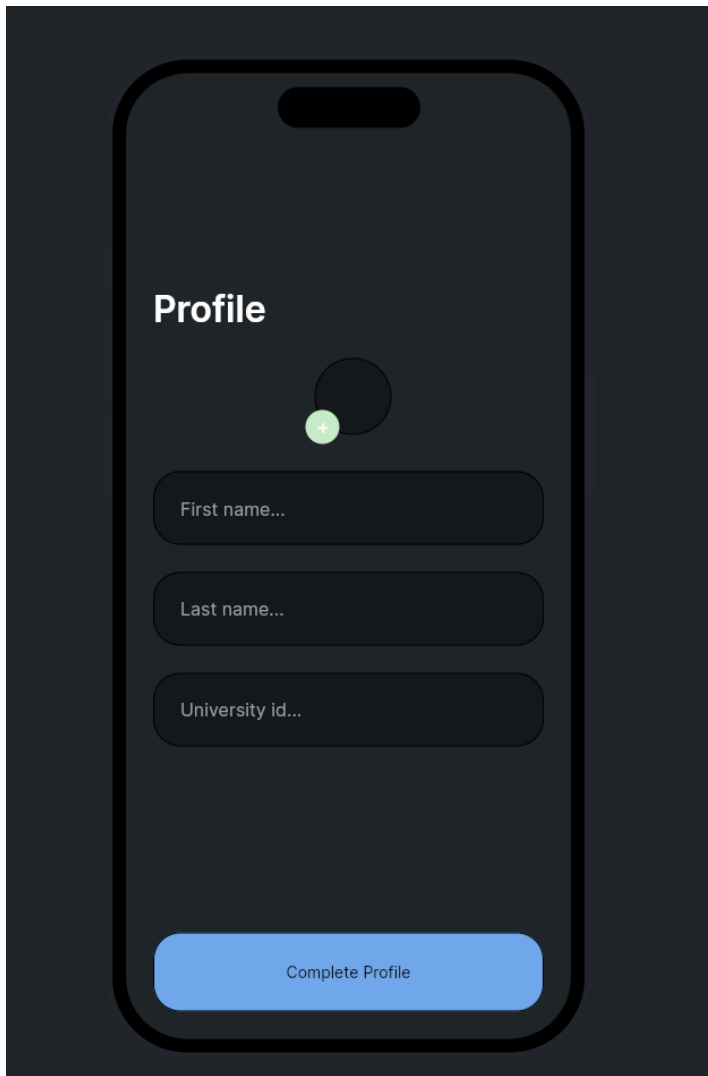

- Step 1: Sign up
 - - Open the app.
 - - On the first screen (Signup):
 - - Enter your Email.
 - - Enter your Password.
 - - Confirm your Password.
 - - Tap Sign Up.

- Already have an account? Tap "Login" instead.

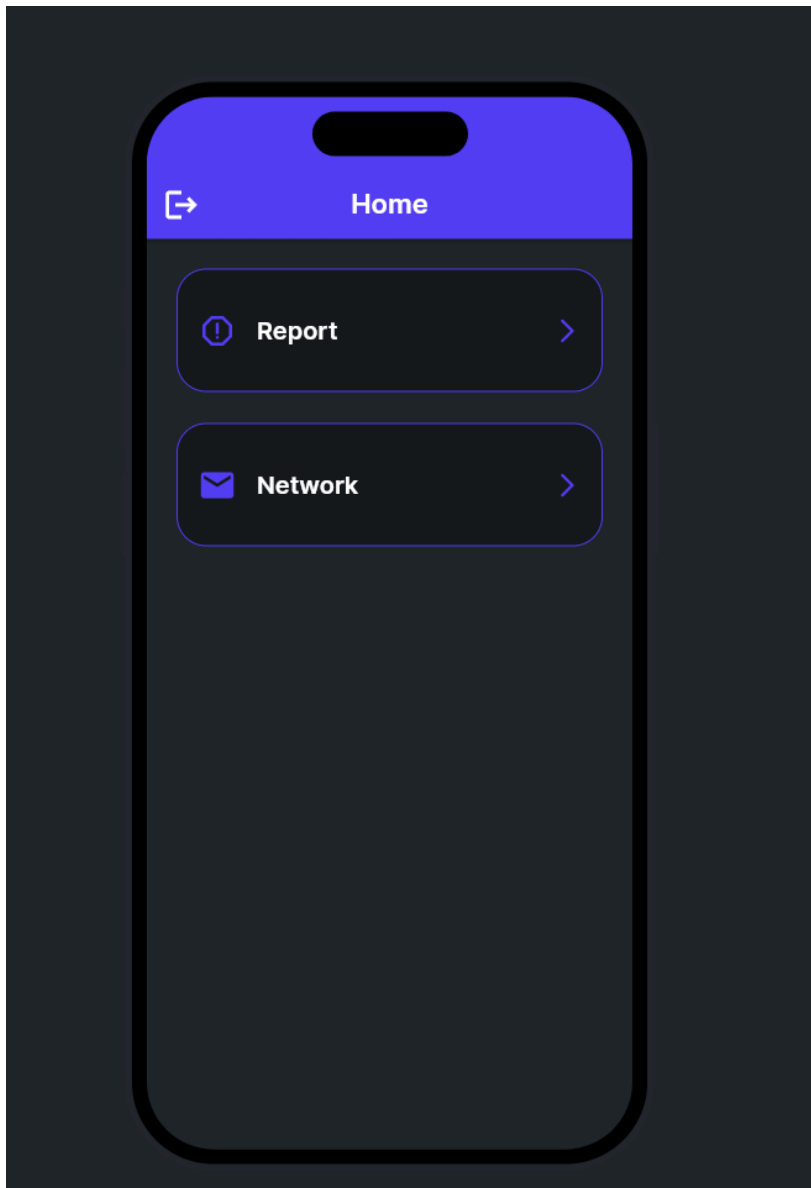

2. Setting Up Your Profile

- Step 2: Complete Profile
- - After signing up, you will be taken to the Profile page.
- - Fill in the following:
 - - First Name
 - - Last Name
 - - University ID
- - Optionally, tap the "+" icon to upload a profile picture.
- - Tap Complete Profile.

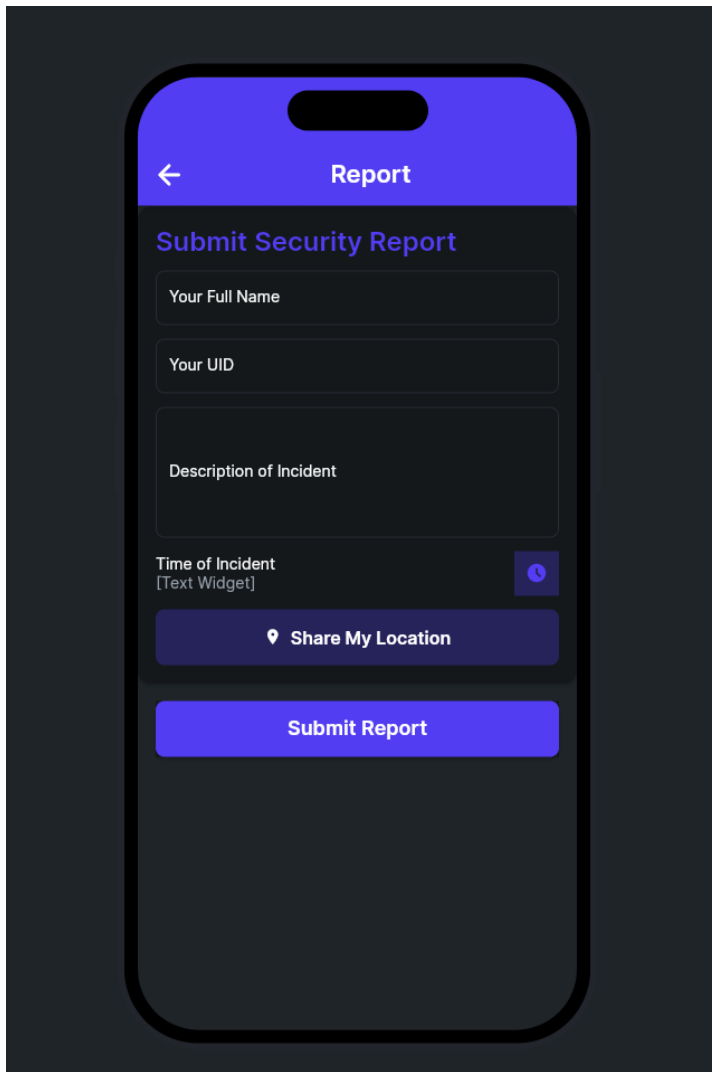

3. Home Dashboard

- Step 3: Navigate the Home Screen
- - After completing your profile, you will land on the Home screen.
- - Available options:
- - Report: Submit a new security report.
- - Network: Connect with your security team.

4. Submitting a Security Report

- Step 4: Report an Incident
- - Tap Report from the Home screen.
- - Fill out the form:
 - - Your Full Name
 - - Your UID (University ID)
 - - Description of Incident
 - - Time of Incident
- - (Optional) Tap Share My Location to automatically add your current location.
- - Tap Submit Report.

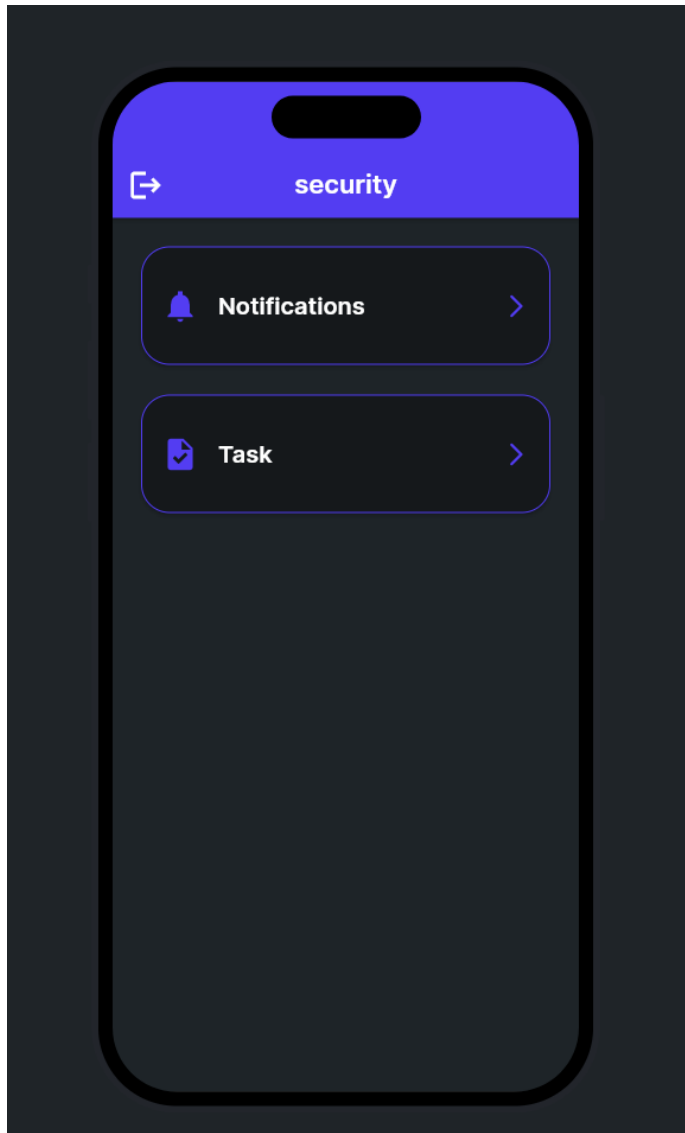

5. Network Section

- Step 5: Viewing Network
- - Tap Network from the Home screen.
- - Inside the Network, you may be assigned a role:
 - - Security (for guards/officers)
 - - Manager (for supervisors/admins)

6. Security Role Features

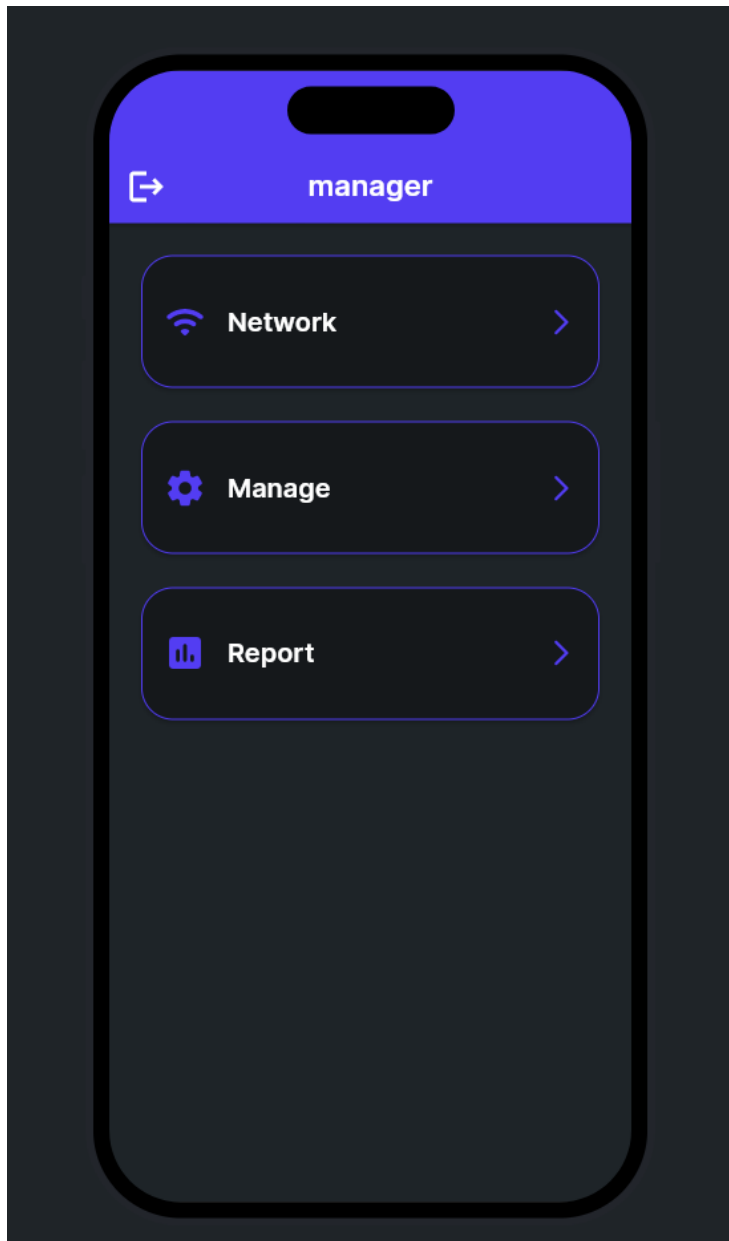

- Step 6: Security Dashboard
- - If logged in as Security:
 - - Notifications: View alerts and updates.
 - - Tasks: View and manage your assigned tasks.

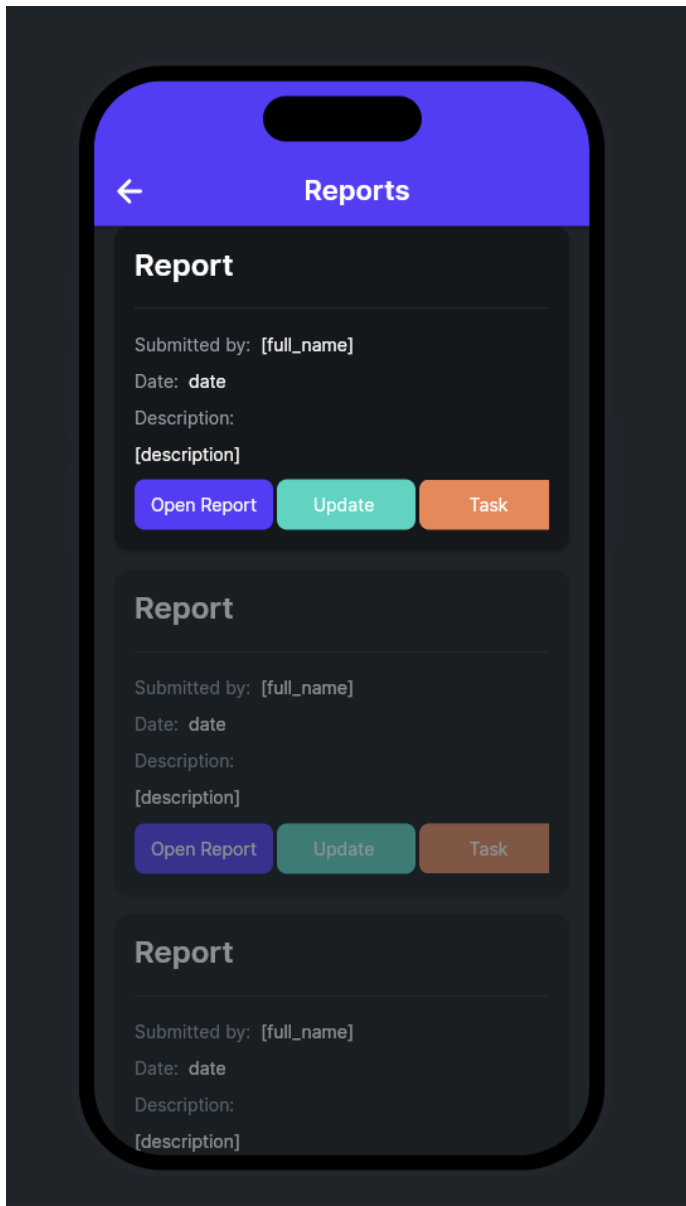

•

7. Manager Role Features

- Step 7: Manager Dashboard
- - If logged in as Manager:
 - - Network: Manage security personnel.
 - - Manage: Adjust settings or view user profiles.
 - - Report: Access and manage submitted reports.

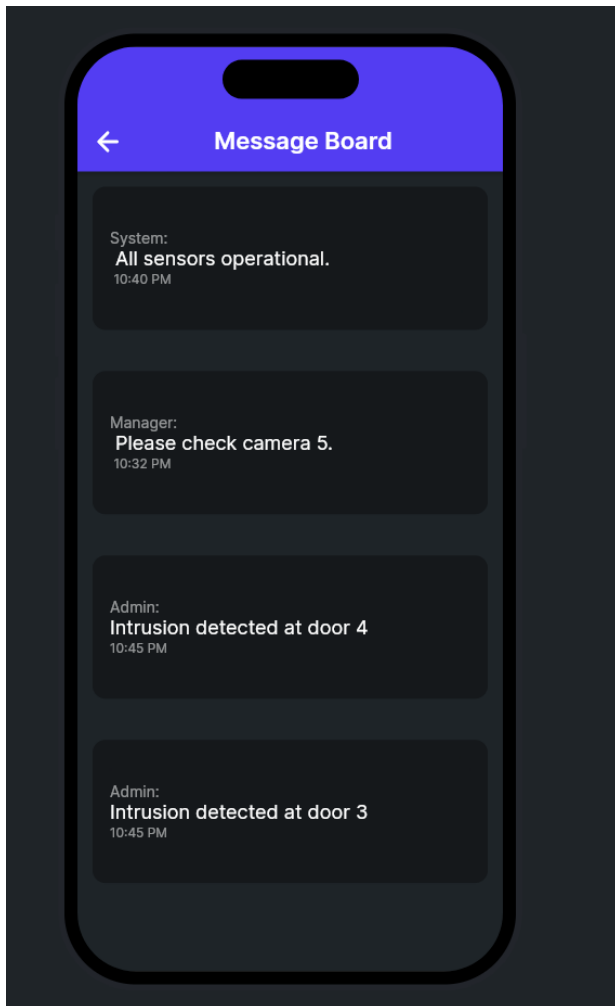

-
- Step 8: Managing Reports
- - Inside Reports:
- - View reports listed by [Full Name], [Date], and [Description].
- - Each report has options:
- - Open Report: View full details.
- - Update: Edit the report if needed.
- - Task: Assign tasks based on the report.

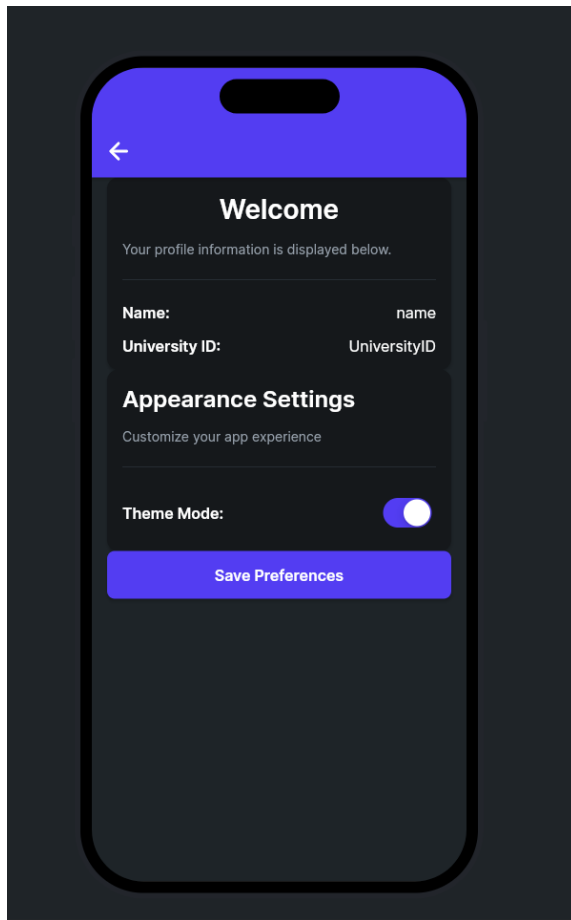

8. Communication Center

- Step 9: Message Board
- - Tap into the Message Board.
- - View real-time messages from:
 - - System Alerts
 - - Managers
 - - Admins
- - Examples: Camera warnings, door breaches, or system statuses.

9. Customizing Your Experience

- Step 10: Profile and Settings
- - View your Welcome screen.
- - See your:
 - - Name
 - - University ID
- - Under Appearance Settings:
 - - Toggle Theme Mode (light/dark).
 - - Tap Save Preferences to apply changes.

•

Notes:

- Always keep your app updated for the latest security features.
- Use strong passwords for better account security.
- Contact your university's security IT department if you encounter technical issues.
